

Installation Instructions — Roof Clips

1548-40RGC Roof Clips

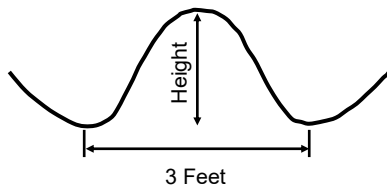

Manufactured by Heat Trace Products, LLC 233 Florence Street, Leominster, MA 01453

Tools Required: Screw Driver

Kit Contents: 25 Roof Clips

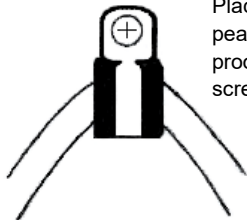

1 Spacing:

Height:

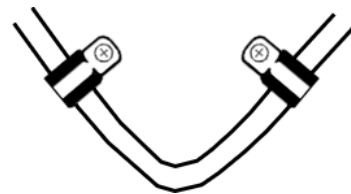

Heater should extend high enough up the roof to extend over the heated part of the building.

2

Place a single roof clip at each peak of the cable. Use weather proof caulk under clip and screw head.

3

Use weather proof caulk under each clip and screw head. Form drip loop at roof edge using two clips. The drip loop should drop over edge and extend into gutter.
