

# WRAP-ON® Pipe Heating Cables Are Safe, Effective And Easy To Install, And With Our New Packaging, Your Customers Will Realize...

## "HEY, I CAN DO THIS!"

### Why WRAP-ON® Does It Better:

- Simply Wrap-On®, Insulate and Plug In! on PVC, CPVC, Metal or Copper Pipe
- Easier to Install than Any Other Cable on the Market
- No Aluminum Foil for Plastic Pipe
- Each Size Color Coded for Easy Consumer Selection
- Energy Saving, 2 Watt Per Foot Design Protects to -50° F

Engineered for use on metal and rigid plastic pipes.

• Exclusive Press-To-Test™ button - test cable before installing!

• Built-in thermostat turns cable on at 38°F.

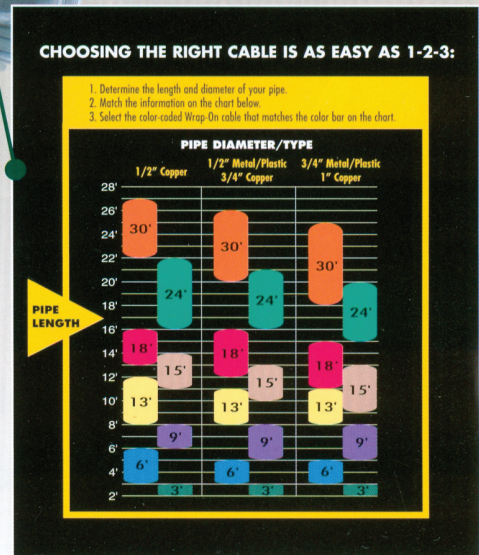

• Proven low wattage design uses up to 70% less energy than other cables and protects to -50°F!

• Exclusive power sensor light glows when thermostat is on.
